Red Cliff Drill Results

Stewart, BC –Mountain Boy Minerals reports that the remaining assay results have been received for the last 12 holes from the Red Cliff drilling. Results are shown as follows:

DDH	From (m)	To (m)	Width (m)	Au g/t
LP-2009-4	147.25	151.22	3.97	2.94
LC-2009-8	61.74	62.20	0.56	3.31
and	74.70	77.74	3.05	1.54
LC-2009-9	35.06	41.16	6.10	2.21
including	38.11	41.16	3.05	3.15
and	43.29	44.33	1.04	1.34
LC-2009-10	35.06	38.11	3.05	2.05
LC-2009-16	24.39	24.69	0.31	4.24

DDH-LP-2009-4 was located on the Little Pat Fraction, 50 meters south of Lydden Canyon. DDH-LC-2009-8, 9, 10 and 16 were drilled in Lydden Canyon. The presence of faulting and post mineral dykes has greatly disrupted and displaced mineralization along Lydden Creek. Before further drilling is conducted in the area of Lydden creek, structural studies will be carried out to help in locating drill hole locations for the 2010 program. During the 2010 program, the Company plans to drill at the south end of the property where pads are already built and in the area of DDH-Mon-2009-1 to 11.

To date, mineralization has been outlined over 1.5 kilometers of strike and is open along strike and at depth. This distance extends from the area of DDH-2009-Mon-1 to 11 to the portals at the south end of the property along Lydden Creek. In the area of DDH-Mon-2009-1 to 11, the zone is obscured by overburden towards the northwest. The Company is applying for permits to extend drill roads to the northwest. At the south end of the claims, parallel copper-gold zones are indicated in the portal area of the original Red Cliff mine workings. To date, exploration has only tested a very small portion of this system.

Ed. Kruchkowski, P. Geo., a qualified person under National Instrument 43-101, has reviewed this press release on behalf of the company.

Mountain Boy Minerals Ltd is a Canadian based mineral exploration company whose activities are in the Stewart area of BC. It is actively exploring for gold-silver-base metals on the Silver Coin project, silver-base metals on their American Creek and Bear Valley properties as well as copper-gold in their Stewart area claims.
