**MOUNTAIN BOY MINERALS LTD.**  
NOTES TO THE INTERIM FINANCIAL STATEMENTS  
February 28, 2009  
(Unaudited – Prepared by Management)

Note 1 Nature of Operations and Ability to Continue as a Going Concern

The Company's shares are listed for trading on the TSX Venture Exchange.

The Company is in the exploration stage and is in the process of exploring and developing its mineral properties and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of amounts shown for mineral properties and related deferred exploration expenditures are dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development of the mineral properties and upon future profitable production or proceeds from the disposition thereof.

These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which assumes that the Company will be able to meet its obligations and continue its operations for its next fiscal year. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. At February 28, 2009, the Company had not yet achieved profitable operations, had accumulated losses of \$3,232,275 since incorporation, had a working capital deficiency of \$639,772 and expects to incur further losses in the development of its business, all of which cast substantial doubt about the Company's ability to continue as a going concern. The Company's ability to continue as a going concern is dependent upon its ability to generate and maintain future profitable operations and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due.

Note 2 Interim Reporting

While the information presented in the accompanying interim financial statements is unaudited, it includes all adjustments which are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the interim periods presented. All adjustments are of a normal recurring nature. It is suggested that these interim financial statements be read in conjunction with the Company's audited November 30, 2008 annual financial statements. These interim financial statements follow the same accounting policies and methods of their application as the Company's audited November 30, 2008 annual financial statements.

Note 3      Mineral Properties

a) Barbara Property

By an agreement dated September 21, 2006, the Company acquired a 50% interest in the Barbara property, which consists of ten mineral claims situated in the Skeena Mining Division in the Province of British Columbia. The property is subject to a 2% net smelter return to a director of the Company of which 1% may be purchased for \$500,000.

The Company acquired the remaining 50% interest in the property by the issuance of 637,500 shares valued at \$357,000.

c) MB Property

The Company has a 100% interest in seven claims representing 41 units located in the Skeena Mining Division of British Columbia.

The property is subject to a 2% net smelter return which may be purchased for \$1,000,000, or one half of which may be purchased for \$500,000.

d) Silver Coin, Indi and Kansas Properties

In addition, the Company staked 12 claims that are contiguous to the reverted Crown-granted claims known as the FR and Kansas Properties.

Pursuant to an option agreement dated March 26, 2004, the Company has acquired an undivided 55% interest in four mineral claims known as the Indi property located in the Skeena Mining Division of British Columbia.

By an agreement dated July 29, 2004, the Company granted another company the option to earn up to 51% of the Company's interest in the Silver Coin, FR and Indi properties by incurring \$1,750,000 on exploration expenditures (incurred).

The Company and the optionee have agreed to form a joint venture for further development of the properties. In addition, the optionee has the right to earn an additional 9% interest in the properties by bringing one of the properties into production. Under the terms of the option agreement, if either the Company or the optionee acquires properties within 10 km of the Silver Coin properties, such additional properties will be part of the joint venture.

The Company acquired the remaining 51% interest in the FR property located in the Skeena mining division, by the issue of 37,500 shares valued at \$21,000. As a result of the Company acquiring a 100% interest in the FR property, the other joint venturer agreed to exempt the FR property from the joint venture and it has been reclassified with Other Properties.
